---

Hello again Bob,

Please see the attached correspondence with the preRD group. Responses to EPA comments are still under review (see notes below). Attachments include:

1. Surface Sediment FSP Agency Review Draft (pdf -7mb)
2. Pre-RD Groups Response to EPA comments (word file has EPA comments with Pre-RD Group responses in blue italic text) – Note: Responses to EPA comments were provided on Wednesday and we are currently reviewing them for adequacy.
3. Subsurface Coring FSP Agency Review Draft (pdf – 9mb)
4. EPA comments on the Subsurface Coring FSP (word file) Note: We have not received RTCs to these comments yet.

Let me know if you have any questions.

Thank you.

S

**Subject:** Sample Locations

Hi Sean,

I wanted to let you know that I received a call from one of the pre-RD group members to discuss the

biased samples currently identified in their sampling plan in the Gasco design area. This was in response to the feedback they recently received from EPA. I provided her with the attached map, which shows all of the samples we already have in the Gasco design area for the types of data the pre-RD group intends to collect. This clearly shows that the biased "SMA delineation" samples they were considering are not needed. I also let them know that we intend to collect design level data gaps sampling this year.

In the process of compiling this figure, we identified that one or more of the proposed samples appears to be on property owned by NW Natural. I asked the pre-RD group rep to have their attorneys contact Patty to discuss access.

I am just providing this for your information, not requesting any action from EPA. We would, however, appreciate receiving a copy of EPA's comments on the pre-RD group's sediment sampling program when they are available.

Thank you,

Bob
